Making Proud Choices is a science-based sexuality education curriculum for middle school youth. The curriculum has been proven to:

- increase youth knowledge of sexual health
- decrease unprotected sex
- increase consistent condom use among adolescents

The curriculum seeks to help youth believe in the value of safe sex, including abstinence. Making Proud Choices connects the concepts of sexual health to future goals and dreams, lowering risk-taking behavior in youth.

Making Proud Choices is medically accurate and complies with House Bill 07-1292. It is currently being used in school districts nationwide.

This program is featured in Emerging Answers (National Campaign to Prevent Teen and Unplanned Pregnancy) and Science and Success (Advocates for Youth) as a proven-effective sexuality education program.
